MOVING FORWARD

DIRECT SUPPLY

Taking Cost Out of Healthcare®

Rely on Direct Supply

for your infection prevention needs

The future of Senior Living safety is here.
It's time to move forward with proactive plans to decrease contaminants in your buildings. With innovation and forward thinking, you can predict pain points in your building and stop them in their tracks for an overall healthier, safer community in your care.

By taking proactive measures to decrease the risk of contaminants, you are protecting the health and wellbeing of your residents and staff. Take hold of the ventilation and circulation in your buildings to reduce odors, contaminants and irritants in your buildings.

Direct Supply offers solutions for safety and caregiver efficiencies like improved air quality, protective gear and more.

**Visit
DirectSupply.net**
for more infection prevention solutions, including top-trending tech that can help you make your building safer for residents, staff and guests.
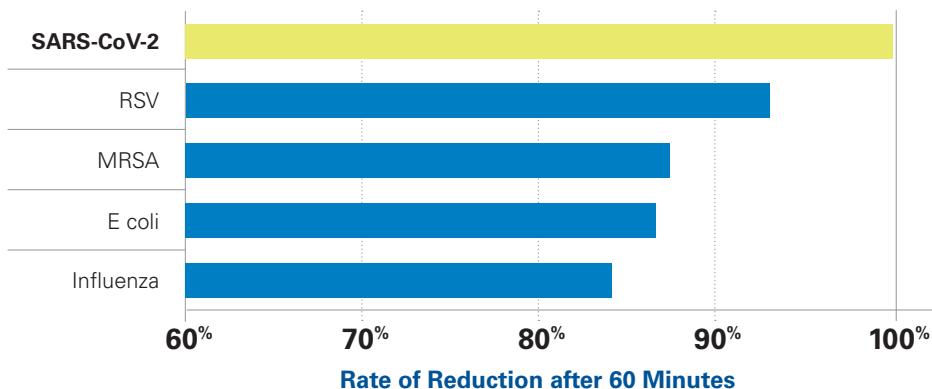

Ensure safer air quality for residents and staff!

Call 888-433-3224 for your free consultation.

Help improve indoor air quality
with Needlepoint Bipolar Ionization (NPBI™)

- Produce a high concentration of positive and negative ions to reduce certain viruses and bacteria
- Can easily be added to existing HVAC systems
- No filters to put extra strain on your system
- No harmful ozone emissions; UL 2998 Certified

Reduce the risk of COVID-19 infection by up to
41%
in Skilled Nursing Facilities*

Tested against a variety of viruses and bacteria:

Virus/Bacteria	Rate of Reduction after 60 Minutes
SARS-CoV-2	~100%
RSV	~93%
MRSA	~87%
E coli	~86%
Influenza	~83%

Rate of Reduction after 60 Minutes
60% 70% 80% 90% 100%

* Comply with all applicable public health laws and guidelines as well as CDC guidance. Estimated reduction in risk of COVID-19 infection up to 41% for residents in Skilled Nursing Communities with NPBI installed in both common areas and resident rooms. Data estimates modeled from data self-submitted by communities to The CDC National Healthcare Safety Network system COVID-19 Long Term Care Facility Module and matched against our database of over 400 NPBI technology installations in Oct 2020 - Jan 2021; full technical paper available upon request. Outside factors such as new variants, cleaning practices, and vaccine rates vary over time and may impact the reduction in a particular community; results not guaranteed. 4/20/2021

Learn more about NPBI
at **bit.ly/air-cleaning**

Reduce airborne pathogens in your community

Choose between three types of air purifiers for your building:

- HEPA-rated Air Purifiers
- Portable Purifiers
- Multistage Air Purifiers with UV-C Technology

Examine the following when choosing your air purifier:

- Size & space
- Noise level
- Non-filter technology
- Pricing

OSHA has created guidelines for protecting healthcare workers, which includes recommendations for maintaining Indoor Air Quality:

- Use MERV 13 filters or higher if possible
- Maximize ventilation
- Properly maintain your system
- Keep air intake filters clean of debris

Contact your account manager directly to identify which purifier is the appropriate solution for the space in your building.

GOOD

A. Honeywell HP300A Air Purifier
🚚 *FREE SHIPPING ELIGIBLE*
- Purifier captures up to 99.97% of airborne particles as small as 0.3 microns, including bacteria, allergens, mold, pollen, smoke, dander and dust
- Circulates room air five times every hour.
- Carbon pre-filter effectively helps neutralize odors
- Accommodates rooms up to 465 sq. ft.

#H2053 Honeywell HP300A Air Purifier

GOOD

B. NEW! HEPA-Type Air Purifier
🚚 *FREE SHIPPING ELIGIBLE*
- Permanent HEPA-type filter offers 3-speed fan settings
- Photo catalyst filter
- UV/VOC on/off button
- Ionizer with separate on/off button
- Clean filter indicator

#H2179 183 sq. ft. Room Capacity, White
#H2180 221 sq. ft. Room Capacity, Black

BETTER

Purifiers utilizing HEPA filtration, as specifically recommended by CDC and ASHRAE

Often ideal for small to medium-sized common areas (< 1000 sq. ft) or temporary/emergency purification (odor removal, etc.)

C. NEW! Fellowes® AeraMax®

🚚 *FREE SHIPPING ELIGIBLE*

- Prefilter captures large particles and contaminants and helps protect the lifespan of other filters
- Active Carbon filtration absorbs odors and VOCs from the air
- True HEPA filter captures and traps 99.97% of airborne particles
- PlasmaTrue™ Bipolar Ionizer improves the capture efficiency of the particulate filter
- Patented EnviroSmart™ technology uses dual self-regulating laser sensors to measure sound, motion and air quality
- With PureView, two high-grade laser particle counters monitor air quality as it enters and exits the machine, enabling the screen to show the air quality data in two different display modes

##GMJ00

D. BISSELL air400 Air Purifier

🚚 *FREE SHIPPING ELIGIBLE*

- Automated CirQulate® System utilizes a PM 2.5 sensor to monitor, report and respond to changes in your indoor air quality by adjusting fan speed as necessary.
- 3 Stage Filtration: includes a pre-filter, an activated carbon filter, and a HEPA filter which can capture 99.7% of 0.3 micron particles and smaller including pollen, dust, smoke, hair, and pet dander.
- Accommodates rooms up to 432 sq. ft.
- Filters Included. Comes with one HEPA filter + Pre-Filter and one Carbon Filter.
- 2 year limited warranty

#GF487 BISSELL air400 Air Purifier

BETTER

Help maintain excellent air quality throughout your community

Do you know the impacts of poor air quality?

Poor air quality can have negative impacts on your residents, including poor health, unnecessary medical expenses, and a lower quality of life in general. 81% of buildings have inadequate ventilation and air circulation. Yours doesn't have to be one of them. **Combat the effects of poor air quality by improving your facility's ionization, HVAC filtration, air purifiers, and HVAC planned maintenance.**

BEST

Combined HEPA with multi-layer filtration, microbial filtration, and/or UV-C integration for proactive pathogen mitigation

Often ideal for areas with low ventilation, crowded areas (waiting rooms, dining halls, etc.).

DIRECT SUPPLY® Taking Cost Out of Healthcare® Catalog 17658

When is the appropriate time to switch to a MERV filter?

You can reduce containment concentrations by proactively focusing on ventilation, filtration and air cleaning in your buildings. MERV filters address the filtration aspect of these three goals. You'll know its time to change filters with this simple guideline:

• Switch to MERV 8 if: your air handler is more than 13 years old and/or is less than properly maintained.

• Switch to MERV 11 if: your air handler is more than 13 years old, is less than properly maintained and you are currently using MERV 8.

• Switch to a MERV 13 if: your air handler is less than 13 years old and is properly maintained.

• If you're currently using MERV 13 air filters – great job! Keep at it and continue to upgrade as necessary.

It is important to monitor the performance of your HVAC system during the first filter change cycle to ensure everything is working properly. This means you should look for:

• Inability to maintain temperature
• Inability to maintain humidity
• Significantly lower airflow

If no issues arise you may want to consider continuing to increase the MERV ratings on your filters to ensure the best possible filter is being used in your Senior Living communities.

Identify potential risks with temperature scanning & screening technology

Prevent infection spread of the flu, COVID-19 and other diseases by capturing staff and guests' temperature and screening question responses in a non-invasive way.

Temperature scanners detect a person's temperature without contact or need for human intervention. They can also automate health screening questions to simplify the building entry process. This technology can help lower staffing expenses, reduce risk of exposure and provide immediate notification for proper staff response to an emergency situation.

Centralized management, facial recognition, temperature screening, question recording and other great features are customizable based on you community's specific needs.

E. Goodview Dynamic Detection Display™
🚚 **FREE SHIPPING ELIGIBLE**
- Within 0.9° F temperature scanning accuracy
- Non-touch scanning within 1 meter (~3.2 ft)
- Mask detection
- Toggle capability for facial recognition features that enable temperature reporting
- Independent relay trigger and alarm
- Custom audio prompts

This is not a medical device. Statements regarding this temperature device have not been evaluated by the FDA. This temperature device should not be solely or primarily relied upon to diagnose or exclude a diagnosis of COVID-19, or any other disease or health condition. Elevated body temperature in the context of use should be confirmed with secondary evaluation methods.

Incorporate powerful technology to help meet your disinfecting needs

Adopting UV-C cleaning systems disinfection technology will complement your existing workflow processes without requiring additional full-time employees.

UV-C Cleaning Systems allow your current staff to work smarter, not harder with easy to operate, tested and proven, medical grade, portable UV-C disinfection device.

A. UVD Robot
- Program the unit to drive into a room and reposition itself multiple times without human interaction; can be put on a schedule
- 6- to 7-log reduction on multiple bacteria types with 10- to 15-minute cycle; UV-C typically has a 4-log reduction
- Features reporting software that can record when a space has been disinfected by the machine
- Price includes on-site training, programming and setup

#8Y464 UVD Robot

B. UV-C Handcart
- Better for larger spaces; can also disinfect small spaces with fewer repositionings needed
- 16' radius kill zone
- UV-C sensors and software measure the UV-C energy being emitted
- Features reporting software that can record when a space has been disinfected by the machine
- Motion sensors automatically shut down the unit when people walk by
- Tether up to eight units together at a time
- Virtual training included

#8Y460 UV-C Handcart
#8Y463 UV-C with Casters

C. UV-C Safezone
- Ideal for use in resident rooms
- Set the cycle for your desired amount of disinfecting time
- Approximate 5-minute cycle is recommended for SARS-CoV-2; approximate 10-minute cycle is recommended for C. diff
- 8' radius kill zone
- Removable top for vehicle disinfection
- 7.5-amp operation allows two units to be plugged into the same outlet
- Rated for 8,000 hours

#8Y461 UV-C Safezone

D. **NEW! BlueMorph UV-C C1 Room Disinfection Unit**

- Uses UV-C to inactivate pathogenic microorganisms
- Can be pre-programmed with any number of different rooms with corresponding custom times to ensure the surfaces and air in the room reach the desired UV-C dose
- Protects users and patients from exposure with motion sensors that shut the lights off if a person is detected
- Large wheels can be taken up stairs
- Records every disinfection cycle which can then be uploaded into an Excel spreadsheet

#GMJ40   BlueMorph UV-C Room Disinfection Unit

E. **NEW! HealthySole Plus**
FREE SHIPPING ELIGIBLE

- Uses UV-C germicidal light to disinfect the soles of shoes in 8 seconds
- Significantly decreases the aerosolizing, migration or transfer of deadly pathogens that may lead to higher healthcare-associated infection rates
- Proprietary high output, plasma stable UV-C lamps, which have patented Plastic Encapsulation Technology™, making them shatter resistant, self-cleaning and ETL listed
- Effective against fungi and bacterial spores that travel on shoe soles leading to the spread of infection via inhalation or horizontal translation from surface and air contamination

#G9919 Citrus, 14 oz. Aerosol, 12/Carton

Eliminate germs and bacteria from high-touch surfaces

Protect your common spaces

As Senior Living communities improve infection control practices, one way to prevent germs from spreading is by properly cleaning furniture, especially in common spaces. According to the World Health Organization and National Institutes of Health, studies suggest coronaviruses and infectious diseases may survive on surfaces for a few hours or up to several days, depending on the type of surface and temperature of the room. The CDC recommends routine cleaning of frequently touched surfaces with household cleaners and EPA-registered disinfectants that are appropriate for the surface.

A. NEW! mycolio DISINFECTANT WIPES
🚚 *FREE SHIPPING ELIGIBLE*

- Provide broad-spectrum disinfection in efficient contact time
- May be used on a multitude of hard, nonporous surfaces

Reduce Bacterial Spread
"The transmission of bacteria is more likely to occur from wet skin than from dry skin; therefore, the proper drying of hands after washing should be an integral part of the hand hygiene process in healthcare"

– Mayo Clinic

[2]Inactivation results based on sensitivity testing conducted by independent third-party testing laboratory using control chambers. Multiple data points are used to formulate performance validation statements. The technology is used in a wide range of applications across diverse environmental conditions. Results in non-lab environments will vary; clients should evaluate their individual application and environmental conditions when making an assessment regarding the technology's potential benefits. For all independent laboratory results, contact your TELS Representative at IndoorAirQuality@Directs.com. The use of this technology is not intended to take the place of reasonable precautions to prevent the transmission of pathogens (including COVID-19). Comply with all applicable public health laws and guidelines as well as CDC guidance (https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/prevention.html).
